GitHub: https://github.com/Oscarv2005 Mobile: +91-9170626659

Skills

- **Languages**: C++, C, Python, JavaScript
- **Frontend:** React, HTML, CSS
- **Databases:** MySQL
- **Frameworks:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, Flask
- **Tools/Platforms:** Visual Studio Code, Jupyter Notebook, Git/GitHub, Power BI, Hadoop
- **Soft Skills:** Problem solving, Quick learning, Time management, Adaptability

Projects

Fintrack: Personal Finance Dashboard | GitHub Aug 2026

- Delivered a personal finance tracker using a React frontend and a Flask + MySQL backend, so users can log their income and expenses and see everything update in real time.
- Established REST APIs for transactions and goals, powering a dashboard that shows income, expenses, savings, and a trend chart based on actual user data.
- Produced a goal tracking feature with progress bars and status updates, so users can mark a goal as not started, in progress, or completed as they save toward it.

Tech: React, Python, Flask, MySQL

Air Traffic Dashboard | GitHub Nov 2025

- Engineered an interactive Power BI dashboard using 40K+ records to analyze airline performance and passenger traffic trends.
- Designed a multi-page dashboard with dynamic slicers (GEO Region, Price Category, Year Month), surfacing insights like 1.52% vs. 30.54% international share by fare type — cutting manual reporting for stakeholders.
- Optimized dashboard performance by creating efficient data models and DAX measures, ensuring smooth navigation and faster report loading.

Tech: Power BI, DAX, MS Excel

Stack Predict: Prediction Model | GitHub Jun 2025

- Built and trained a Linear Regression model in Scikit-learn to predict visitor session value, using 12,000+ real e-commerce sessions and behavioral signals like bounce rate and exit rate.
- Integrated a React frontend, Node.js/Express API, and Flask ML service into a single end-to-end pipeline, with all three components communicating seamlessly via REST APIs.
- Architected the Flask service with a modular, swappable model design, laying the groundwork for future upgrades like Random Forest and real-time personalized product recommendations.

Tech: React, Node, Express, Python, Pandas, Matplotlib, Flask, Scikit-learn

Training

Machine Learning Made Easy: From Basics to AI Application | Link Jun 2025 - Jul 2025

- Acquired foundational knowledge of machine learning, including common algorithms and model evaluation techniques.
- Worked on data preprocessing, feature engineering, and training supervised and unsupervised machine learning models.
- Applied machine learning concepts to solve real-world problems using Python and Scikit-learn.

Tech stacks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Flask

Certificates

- Cloud Computing by NPTEL | Link May 2026
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate by Oracle | Link Feb 2026
- Certified Essentials Automation Professional by Automation Anywhere | Link Dec 2025

Achievements

- Achieved a 1600+ peak rating on LeetCode through consistent participation in coding contests and problem-solving.
- Solved 100+ Data Structures and Algorithms (DSA) problems.

Education

Lovely Professional University Punjab, India
Bachelor of Technology - Computer Science and Engineering ***CGPA: 6.14*** *Aug 2023 - Present*

S. R. Public School Orai, Uttar Pradesh
Intermediate; ***Percentage: 68.6*** *Apr 2021 - Mar 2022*

S. R. Public School Orai, Uttar Pradesh
Matriculation; ***Percentage: 79.6*** *Apr 2019 - Mar 2020*
